In hard times of world trials, the Assembly affirms its loyalty to the chosen path: partnership and good neighborliness of peoples based on common interests and goals in the name of peace, friendship and harmony.

We are all inhabitants of the Earth - our common home. We are all equally responsible to history for preserving our predecessors' achievements, we can be proud of. We are responsible to future generations for preserving and transmitting of universal human spiritual and moral values.

At the present moment, humanity is going through a crisis: diseases, cataclysms, conflicts, military clashes. The old models of international relations, that had previously created sustainability, have already been destroyed and do not meet the requirements and challenges of our time. Responsibility lies not only with politicians or heads of States; the responsibility also lies with each of us.

Our task is to keep the bridge of interaction and cooperation, to further strengthen our understanding of the conscious interdependence of countries and peoples.

Five years ago, when the Assembly was being established, all participants and delegates were united by mutual understanding, trust, goodwill, faith in common forces. All these years we support each other, help in difficult situations, create together, rejoice and dream.

Today it is important to preserve this line of interaction, stay in spiritual unity, preserving and increasing the fundamental human quality - Love.

Peace and happiness are impossible for a single person or people, a single country or continent. Only together can we build a safe and happy future.

In unity is our strength of Creation!

Secretary General

A.Yu. Belyaninov
